2023 Fact Sheet on Risk Factors Related to Mental Health and School Climate among LGBTQ+ Youth in Utah.

Looking at the Utah SHARP Survey
This fact sheet is based on data from the Utah SHARP Survey, a state survey given to all students every two years. The survey identifies the antecedent factors that are most strongly linked to emotional distress and mental health problems in students. In 2023, the survey included questions about gender identity and sexual orientation for 4th, 6th, and 8th graders. In 2023, UTU was responsible for 31.0% of the sample, and the remaining 69.0% were from the U.S. Department of Education's National Center for Education Statistics.
